# Experience a Convenient, Modern Approach to Customer Engagement

The 2023 AFPM Summit, Excellence in Plant Performance, is an interactive conference that will provide attendees with tangible takeaways. Themes throughout the conference will highlight emerging technologies, sustainability, process safety, process technology, reliability and maintenance, operations, training, leadership, and digital transformation. This conference is focused on improving plant performance.

We stepped away from the traditional tradeshow experience in 2022 by creating "The Hub," a place where a limited number of exhibitors could invite the operating company attendees into their lounge spaces for engaging conversations to network and collaborate.

We also offered exhibitors alternative activation opportunities where they were able to host educational sessions in individual meeting rooms or host evening hospitality events in hotel meeting rooms or suites.

The format was well-received in 2022 and we will continue to build on this success by offering exhibitors similar exclusive opportunities in 2023.

# An Innovative Approach to Exhibiting

We've adopted a new turn-key approach to exhibiting, allowing you to get more out of the experience without the lengthy, time-consuming, and costly process of shipping, installing, and dismantling your own booth. Your lounge is in the center of all the action. Education sessions, meals, and breaks are just steps away from your lounge. Attendees will pass by your lounge many times throughout the day. No more waiting for a potential customer to find your booth. We are putting your lounge in the pathway of the attendees. Opportunities are limited so please act fast to secure your space. Member companies receive priority status prior to June 23, 2023.

Priority Member Deadline:
